

# The Ultimate Drain Clog Remover

by nature's drain™

golderEnvironmental  
products inc.

Nature's Drain patented enzyme and microbial drain clog solution eats through organic clogs without creating toxic fumes or damaging pipes. Get the job done without hurting the environment.

### What is it?

A clogged drain can stop operations at home in the kitchen sink, bathroom sink or shower/tub. Nature's Drain combines fast-acting chemistry to open clogged drains with a patented beneficial microorganism that continuously degrades organic drain buildup. The long-lasting microbial action of Nature's Drain helps maintain free-flowing drain lines and reduce the organic matter that cause malodors.

### Where do I use it?

Nature's drain works great at home and also in industrial situations such as a healthcare facility or busy restaurant. Nature's Drain has been confirmed by independent laboratory testing to open clogged drains and effectively remove congested sinks and drain soil made of grease, fat, starch, sugar and protein. This same independent laboratory's tests show that Nature's Drain performs better than the leading brand of drain openers. The buildup of organic matter in the drain line is a major cause of blockages and slow-running drain lines.

The EcoLogo™ designation is used for formulations that utilize biodegradable surfactants at a neutral pH, contain no phosphates, no solvents, and low concentrations of volatile organic compounds (VOC). So it is safe for user and the Environment.

## Features and Benefits

### Effective drain opener

- Independent laboratory test confirms that Nature's Drain opens clogged drains and effectively removes congested soil. Nature's Drain performance is superior to the leading brand of caustic acid drain cleaners
- Helps maintain free-flowing drain lines and prevent drain blockages on a continuous basis by degrading organic matter found in most drains
- Reduces the need for additional drain treatment and maintenance

### Long-lasting odor control

- Provides long lasting odor reduction by breaking down odorous volatile fatty acids and odor-causing organic buildup

### Patented microbial technology

- Patented microbial technology for long-lasting grease interceptor performance, even under harsh or low-pH conditions

### Is it safe?

In choosing a product, we wanted to be sure the product we used did not contain dyes, ammonia or chlorine. The product is made from pure, renewable, patented plant extract ingredients which works as well as traditional caustic drain cleaners.

Rated at EPA Category IV Toxicity (safest rating allowed) for all routes of exposure.

Not a Workplace Hazardous Materials Information System (WHMIS Canada) regulated product

### Example: Microbial cleaning of a drain from a vascular clinic

Organic material gets sent down this drain, including gel used for ultrasound tests. The drain opened after the first application. A second treatment removed all the residual GUNK!!!
